ToolBox

Stock Digitalization for Enhanced Performance

Tools. Next Level.

ToolBox

Your stock management reimagined for excellence

You benefit from an innovative solution for efficient stock management. Our system allows you to reduce consumption, optimize stock levels, and streamline your tool range. By lowering procurement and storage costs, ToolBox transforms your management processes.

Thanks to automated ordering, administrative tasks are reduced, allowing you to save time and cut operational costs. The result: increased productivity and enhanced efficiency for the optimal operation of your business.

Performance, efficiency, profitability

ToolBox redefines stock management to give you greater control, productivity, and cost savings. Here's what you gain:

Search Time	-50%
Product consumption	-40%
Stock levels	-20%
Machine downtime	-15%

-  Smart stock management
-  Automatic orders
-  Traceability and transparency of movements
-  Easy integration with professional support
-  Easy integration with professional support
-  Digitization of your processes
-  Easy to use
-  Open to all suppliers
-  24/7 availability
-  Robust systems (200kg per drawer)

Hive - Inventory

Stock management software

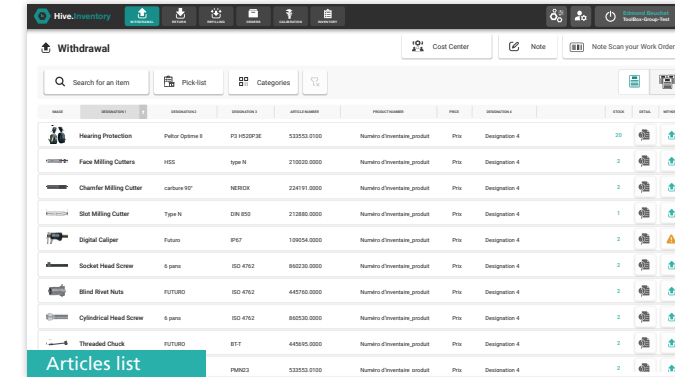

Developed in response to concrete customer needs, Hive - Inventory is now used daily by more than 5,000 users. Its advanced product and item management ensures precise and fully controlled inventory tracking.

By digitizing all intra-logistics processes, this solution offers unlimited scalability, allowing companies to adapt and grow without constraints. The optimization of flows results in a significant reduction in costs and maximum operational efficiency. By eliminating low-value-added tasks, Hive - Inventory simplifies users' daily work and improves productivity.

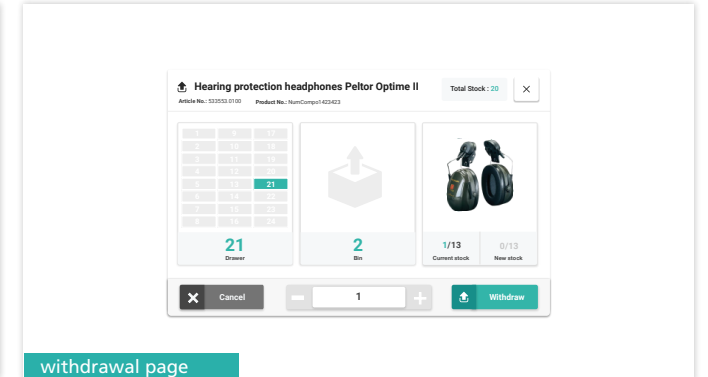

Whether with a ToolBox or other storage systems such as Kardex or Hänel lifts, Hive - Inventory integrates transversally across the entire company, ensuring smooth and centralized stock management.

- Fast search and retrieval
- Quantity tracking
- Real-time stock value
- Turnover rate analysis
- Analysis of key cost drivers
- Statistics by cost center and work order
- Transaction history
- Management of measuring instruments
- User-specific access rights
- Barcode usage
- Automatic orders
- 100% traceability

Product detail

Store management

Management of measuring instruments

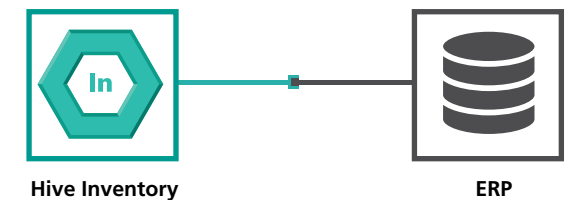

Hive - Inventory Provides Precise, Reliable, and Compliant Management of Your Measuring Instruments. Thanks to its advanced tracking and control system, each piece of equipment is optimally managed to ensure compliance with current standards.

- Automated calibration management: Non-compliant instruments are immediately blocked and ready to be sent for calibration.
- Centralized certificate tracking: Each instrument has its calibration data, ensuring perfect traceability.
- Compliance with standards and quality requirements: Ensure transparency and reliability in your metrological management.

ERP Integration

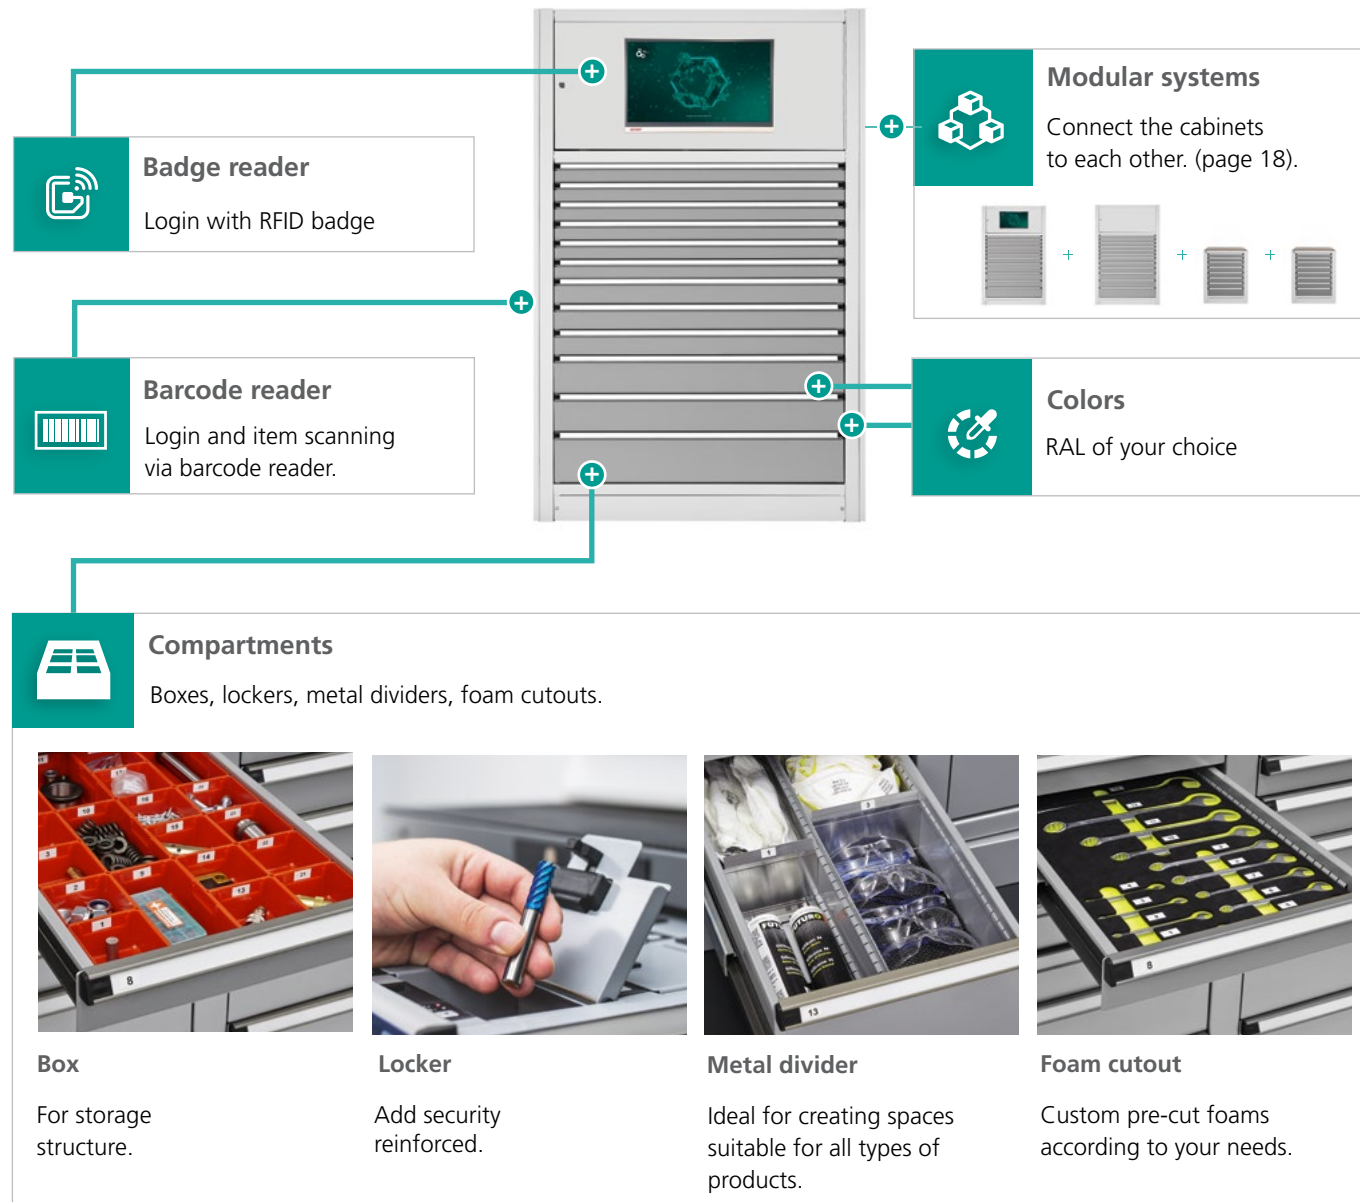

Data synchronization with third-party systems

ToolBox

Assembly and customization

ToolBox - Basic / Largo / Slim

ToolBox Basic

The Basic system is the most compact model in the ToolBox range. It allows for discreet integration in areas with limited space. Its 1-meter height helps maintain an open space.

Cabinet dimensions	
Width	816mm
Height	1000mm
Depth	711mm
Drawer width	612mm
Drawer depth	612mm
Drawer height	75 / 100 / 150 / 200mm
Usable drawer height	60 / 85 / 135 / 185mm
Total drawer height	800mm

ToolBox Largo

With its 1088 mm wide drawers, the Largo model offers the best surface/price ratio. The ideal solution for managing a large quantity of items.

Cabinet dimensions	
Width	1294mm
Height	2000mm
Depth	711mm
Drawer width	1088mm
Drawer depth	612mm
Drawer height	75 / 100 / 150 / 200mm
Usable drawer height	60 / 85 / 135 / 185mm
Total drawer height	1250mm

ToolBox Slim2R

The drawers of the Slim2R models are narrower due to their two-column layout, limiting and securing access to materials when a drawer is opened.

Cabinet dimensions	
Width	918mm
Height	2000mm
Depth	711mm
Drawer width	306mm
Drawer depth	612mm
Drawer height	75 / 100 / 150 / 200mm
Usable drawer height	60 / 85 / 135 / 185mm
Total drawer height	1250mm

ToolBox Slim3R

The Slim3R cabinet is a variant offering even more drawers. It allows for the management of a large quantity of items within a single cabinet while securing access.

Cabinet dimensions	
Width	1327mm
Height	2000mm
Depth	711mm
Drawer width	306mm
Drawer depth	612mm
Drawer height	75 / 100 / 150 / 200mm
Usable drawer height	60 / 85 / 135 / 185mm
Total drawer height	1250mm

ToolBox - Lista LEC & FUTURO

ToolBox Lista LEC

The LISTA-LEC range offers multiple customization options and ensures seamless integration into your production environment. The flap drawer option provides optimal protection against unauthorized access.

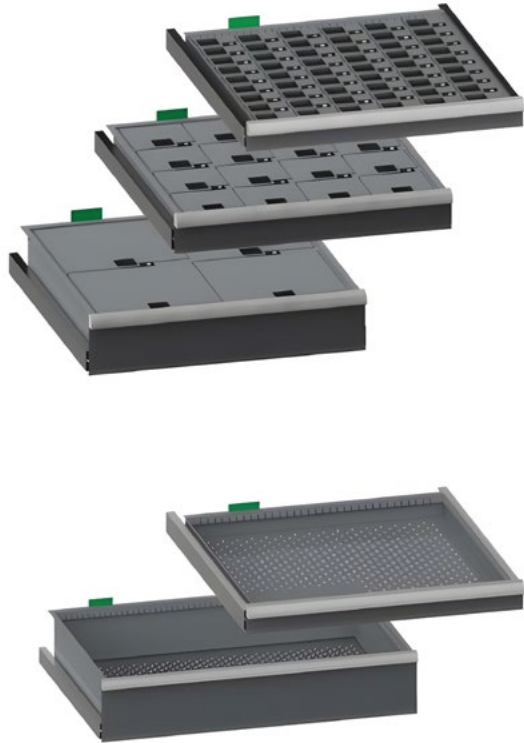

Cabinet dimensions	
Width	717 / 1023mm
Height	700 / 850 / 1000 / 1150 / 1450mm
Depth	725mm
Drawer width	612 / 918mm
Drawer depth	612mm
Drawer height	75 / 100 / 150 / 200 / 250 / 300mm
Usable drawer height	60 / 85 / 135 / 185 / 235 / 285mm
Number of compartments (with flaps)	Multiple of 4 (maximum 54)

ToolBox FUTURO

The FUTURO range offers a turnkey (Plug & Play) solution, ensuring quick integration. With systems readily available in stock, you can launch your digitization project without delay.

Cabinet dimensions	
Width	1005mm
Height	1204mm
Depth	725mm
Drawer width	900mm
Predefined configuration	6x 100mm / 2x 150mm

Drawers with Compartments
(LISTA Parts Control)

LISTA drawers with compartments are specially designed for the **LISTA Parts Control** access control system at the compartment level. Available in three heights, they offer a storage capacity ranging from 4 to 54 metal compartments.

Combining optimal quality and security, these drawers ensure reliable and efficient management.

Drawers without Compartments
(LISTA Drawer Control)

LISTA drawers come in six heights and integrate the **LISTA Drawer Control** access control system directly at the drawer level. True to LISTA quality, they stand out for their robustness, smooth sliding, and meticulous in-house finishes.

ToolBox - Vending

ToolBox Vending (Master)

The spiral cabinet stands out for its high level of security. Only the item selected on the screen is dispensed, ensuring flawless traceability and optimal control. It represents the most efficient solution in terms of value for money.

Cabinet dimensions	
Width	1340mm
Height	1940mm
Depth	860mm
Number of spirals	Max. 60x
Total storage slots count	Max. 960x
Load capacity per level	45kg
Total load capacity	270kg

Standard vending version (6 levels, 420 slots)

- 5 levels of 10 spirals of 8 slots (400 slots)
- 1 level of 4 spirals of 5 slots (20 slots)

Plug & Play Option

Vending systems can be installed in just a few hours. Free yourself from integration into your company's IT infrastructure. Equipped with a 4G router, the system communicates directly with the internet for order generation and maintenance.

Options ToolBox Vending (sur demande)

- Spiral diameter
- Single/double motor

Customization

Integrate Vending systems into your environment with a custom design. Our graphic team will propose a version perfectly aligned with your visual identity.

ToolBox - Other models

Carousel

The system is equipped with a rotating drum that allows for storing a large quantity of items in independent compartments. Thanks to a clever flap, only the selected location is unlocked, ensuring that the user only accesses the item designated by the software. This technology combines maximum security with great flexibility.

Cabinet dimensions	
Width	1200mm
Hauteur	2000mm
Depth	1200mm

Hänel / Kardex

Integration for Kardex and Hänel lifts is also available. This includes a PC and a touchscreen, which can be directly adapted to an existing system. We also offer a complete solution, including the lift and its management system.

Cabinet dimensions	
Width	Sur demande
Hauteur	Sur demande
Depth	Sur demande

Scale

This system is equipped with weighing cells that ensure continuous monitoring of the quantity of items in stock. It eliminates the need for the traditional picking process, which requires manually entering the number of items removed.

Cabinet dimensions	
Width	1067mm
Hauteur	2000mm
Depth	540mm

Master / Extend combination

Our distribution cabinets are available in two versions: Master and Extend. The Master version is equipped with a control screen, allowing for centralized system management. The Extend version, without a screen, is designed to be combined with a Master cabinet, providing a scalable and optimized solution.

Only one screen is needed to control multiple cabinets, ensuring flexible and cost-effective usage.

All systems are compatible with each other and have no specific limitations in terms of the number of interconnections.

ToolBox Largo (Master)
